Climate, Energy, Sea Level Rise – Problem and Solution Spaces

Dennis M. Bushnell will present sea level and climate change models along with their impacts on coastal cities such as Jacksonville. Conventional climate wisdom is represented by the IPCC reports, which have proven to be conservative. Dennis will discuss a number of different opportunities to address these issues which include renewable energy solutions, energy conservation, geoengineering, and as a last resort, altering ourselves to persevere in whatever climate changes may occur.

Mr. Bushnell has 49 years of experience as a research scientist and is the chief scientist of NASA’s Langley Research Center, which has technical emphasis in the areas of Atmospheric Sciences. Mr. Bushnell is the author of 252 publications and major presentations, and has been invited to speak at over 350 seminars.
